U.S. EPA ID No. NYD072710502

Comments _____

Specific process
generating wastewater

Is this waste generated

Anticipated volume

If repetitive, is the
waste currently

water from site cleanup

☐ From a one-time event?
☐ By a repetitive process?

42,000 gals one-
time
per year

☐ Managed as new waste?
☐ Treated by DuPont?
☐ Treated by another facility?

DOT Shipping Name "RQ" Hazardous Waste Liquid, N.O.S. (silver)

Hazardous Class 9, PGIII UN/NA Number NA3082 RQ Y/N

RCRA hazardous and/or state codes applicable to this waste stream D011

Waste stream composition

Components

silver

water

dirt/detergents

Wt% or PPM

6-18 ppm

98-99%

<1%

pH range 7 Flash point none Approx. TSS < 2 % Approx. TOC < 1 %

Other information (e.g., TCLP metals and/or TC organics and concentrations). Attach analysis if available.

Generator's Certification:

I hereby certify that I am authorized to sign this form on behalf of the wastewater generator identified, and that I have personally examined and am familiar with the information submitted in this and all attached pages. Based on my inquiry of those individuals immediately responsible for obtaining the information, the submitted information is true, accurate, and complete, and all known and suspected hazards have been disclosed.

INSTRUCTIONS

for completing
DuPont Environmental Treatment Preshipment Notification Forms

HAZARDOUS WASTEWATER

When to use this form

DuPont requires one-time, preshipment notification whenever waste from an additional generator is being shipped under a generic contract. This notification is only required prior to the *first* shipment from a new generating site, and will remain valid as long as the process and composition of the waste stream do not change. Every two years, during contract (OW/DW) requalification, the list of generators under a generic contract will be verified.

Why use this form?

A generic contract is a contract (OW/DW) for specific waste streams generated from the same type of process, such as groundwater monitoring wells or boiler cleanouts. Preshipment notification allows DuPont to verify the composition of each waste shipment sent under a generic contract. It also allows us to continue to offer generic contracts to waste management firms, saving you valuable time and money in the process. The NJDEP Enforcement Division requires DuPont to follow this procedure.

What is required?

- ☐ OW/DW for the generic contract
- ☐ Generating location
- ☐ Type of process generating the waste
- ☐ Certified waste characterization profile, signed by the generator or an authorized representative

How to use this form

1. Fill out all information requested on the reverse side.
2. Fax the form to our Waste Acceptance Facility at 856-540-3402.

To ensure smooth shipment acceptance, send notification at the time of scheduling, but no later than 24 hours before shipment arrival.

If we do not have this information by the time the shipment is received, we will not be able to accept the waste.

For more information

If you have questions about the preshipment notification procedure, please **contact Customer Service at 1-800-626-1717**

(see contract on reverse side)
